Experience

IIT Delhi Research Internship

[Remote](#) [↗️](#)

Machine Intelligence signals and Networks Lab

10 June 25 – 10 Sept 25

- Contributed to Adi-Vaani, India's first Adivasi language translation app for speech-to-speech translation.
- Supported languages including Gondi, Bhili, Santali, and Mundari
- Utilized LLMs, Prompt Engineering, and Hugging Face Transformers for model accuracy.
- Managed datasets using Python (Pandas), SQL, and Label Studio.
- Collaborated with researchers to debug model outputs and improve translation accuracy.

Data Entry and Lead generating Intern

[Remote](#) [↗️](#)

Mechatron Learning Hub a business unit of Mechatron Technologies

09 June 25 – 18 Sept 25

- Processed and cleaned structured datasets with 98% accuracy using Excel.
- Optimized an Excel-based lead generation and tracking system for sales outreach.

Technologies & Skills

Languages : Python, C, C++, R, SQL.

Software Development : Data Structures, Algorithmic Problem Solving.

Tools & Platforms : GitHub, Jupyter Notebook, VS Code, Kaggle, MySQL, LaTeX, MATLAB.

Web Technologies : HTML, CSS.

Machine Learning & AI : Machine Learning, Deep Learning, Computer Vision, NLP, CNNs.

Generative AI & LLMs : Large Language Models (LLMs), Prompt Engineering, Hugging Face Transformers.

Frameworks & Libraries : TensorFlow, Keras, PyTorch, OpenCV, NumPy, Matplotlib, NLTK.

Soft Skills : Problem Solving, Team Collaboration, Communication.

Achievements & Training

- **AlgoUniversity Tech Fellowship:** Selected for a merit-based fellowship among 2 lakh applicants, top 0.02%, worth 1,00,000.
- **Training:** Infosys Springboard certified in Data Science, Web Development, and Java Programming and completed the Goldman Sachs Catalyst '25 Engineering Program (Ananya).

Technical Projects

Emotion Detection

[Github](#) [↗️](#)

- Built a CNN-based facial emotion recognition model using Python, TensorFlow, and OpenCV, performing preprocessing, feature extraction, and training on the FER2013 dataset, achieving 61% accuracy after hyperparameter optimization.

Traffic Detection

[Github](#) [↗️](#)

- Developed a computer vision system to detect and count vehicles in real-time using line-crossing logic..

AI Health Guardian

[Github](#) [↗️](#)

- Developed an AI-powered healthcare assistant that analyzes symptoms and emotions to predict risk levels and provide real-time actionable medical guidance also help to find the nearest hospital or doctor clinic.

Online judge with AI

[Github](#) [↗️](#)

- Developed an AI-powered Online Judge with React, Node.js, MongoDB, Docker, JWT, multi-language execution, leaderboard, AI code analysis.

Netflix Clone Website

[Github](#) [↗️](#)

- Built a responsive Netflix clone using HTML and CSS, replicating the original UI design and layout with real assets.

Research & Open Source & Hackathons

- **Graph Neural Network–Based Parkinson's Disease Detection:** Prepared a research manuscript proposing a Graph Neural Network (GNN) layer for modeling motor symptoms in Parkinson's disease.
- **Selected in GirlScript Summer of code 2026 & Social summer of code season5 as a contributor.**
My team Code Girlss reached ELITE HER Hackathon 2026 finals, ranking in top 20 of 1000+ teams.

Education

Govt. Mahila Engineering College, Ajmer

Sept 2023 – June 2027

B.Tech in Artificial Intelligence and Machine Learning (CGPA: 8.08/10)

K.C. Public senior secondary school(CBSE)

Apr 2021 – Mar 2022

Senior Secondary Level(70%/100)

Maharishi Dayanand Inter College(UP-Board)

Apr 2019 – Mar 2020

Secondary Level (88.6%/100)

Language

Hindi, English, Korean(Beginner)
